

## MATH WORD PROBLEMS FOR KIDS

1. Owen brought 5.4 pounds of peanuts to a party. Mason ate all but 1.8 pounds of them. How much did he eat?
2. 36 kids were riding on a bus when it broke down. They wanted to play baseball while they waited. If there are 9 people on a team, how many teams could they form?
3. Hazel works for 7-11 repairing Slurpee machines. It's a complicated job, and Hazel is one of the best at it in the world. Last week she made \$6,243. She took her money and threw a big party for her friends. She had \$2,467 left after paying for the party. How much did it cost?
4. Sakara rescues sea turtles. The largest one she ever saved weighed 178 kilograms. The smallest one was 143 kilograms lighter than the largest. How much did the smallest one weigh?
5. Jackson jammed 4,396 Ritz crackers into his backpack. When he got to school, 3,867 of them were smashed. How many were still ok?
