

# Word Problem Delight 102

Do your best! Show all work and place your answer with a word in the space after the problem.

Carolyn sang to herself as she baked the giant cake.

1. Nolan once had a bag with 469 marbles in it. The other day he checked the bag and there were only 327 left. He decided to give 150 of the remaining marbles to charity. How many does he have today?
2. Sometimes Logan goes into his secret lab and makes invisibility potion. He can make 6.3 ounces in an hour. If he worked in the lab for 8 hours, how much potion could he make?
3. When Loree was on safari in Ohio, she saw many exotic beasts. At one point she saw a herd of squirrels! Loree counted the squirrels which were in little groups of 5. If she counted 7 groups, how many squirrels did she see?
4. The 530 pound cake that Carolyn brought in for the class was delicious. By the time the party was over, there was only 65 pounds left. How much had the kids eaten?
5. A Hostess Twinkie weighs 2 ounces. If Ian builds a model of the Statue of Liberty, using 6248 ounces of Twinkie, how many Twinkies will he need?
